

Certificate

UXQB® Certified Professional for Usability and User Experience – Foundation Level (CPUX-F)

Enrico Maioli

has successfully passed the exam for the certificate Certified Professional for Usability and User Experience – Foundation Level (CPUX-F). The exam took place on 20th April 2022 in Ravenna and was conducted by the certification body Certible GmbH.

The certificate confirms that the certificate holder has an understanding of the general terms and concepts in the field of Usability and User Experience, in particular in the following areas of competence:

- The human-centred design process
- Definitions, concepts and guidelines
- Understanding and specifying the context of use
- Specifying the user requirements
- Producing design solutions
- Usability tests
- Usability inspections and user surveys

The exam is based on the curriculum of the International Usability and User Experience Qualification Board (UXQB), publicly available at www.uxqb.org.

Due to the number of points achieved, the holder of this certificate has obtained the authorization to carry out preparatory courses for the examination to the CPUX-F.
